

PROJECT

Neighborhood Map

A part of the Front-End Web Developer Nanodegree Program

Unable to review

Your project could not be reviewed. Please resubmit after you address the issue noted by the reviewer.

Hello!

Thank you for your submission. Unfortunately this project is not complete for the following reasons:

1. App is not responsive

2. Missing filter function to filter location list and markers on the map.
3. Clicking on location in the list doesn't activate the associated marker

4. Current search function is a big confusing. There are many `input` s, including the `checkbox` for each locations in the list:

Selected local service centers:

Shelter:

☐ Huckleberry House

Survivors:

☐ Turning point

☐ Gracehaven

Information:

☐ Star house

Collaboration:

☐ Hands On Ohio

Report street where incident(s) observed:

Information about your state:

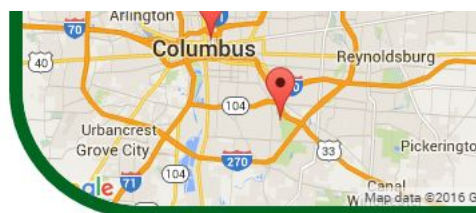

Research in your city:

In addition, when I type some bad keyword (`asdfsdf`) into the `input` s, Wikipedia Links still contains result, while the others are empty and don't show any error warning.

Report street where incident(s) observed:

Information about your state:

Research in your city:

New York Times

Wikipedia Links

NSF Research in your City

5. There are no Ajax request provided that provides location-specific details. The current "Visit Website" link in `infowindow` is hard-coded in JS file.
6. etc...

Project submission is intended for projects that have taken into account all the project requirements as described in [the rubric](#). Please review this, and consider using the [project forums](#) or scheduling a 1-1 appointment to ask any questions you may have. If you have further questions, you may email in to review-support@udacity.com.

Good luck and happy learning!
